## Heartcore Enterprises (HTCR-NASDAQ)

**INITIATION: Established software development company poised for strong growth after proposed transformative acquisition. The company is well funded to support future operations.**

Utilizing a discounted cash flow valuation process containing conservative estimates combined with other valuation methodologies, we believe HTCR could be worth **\$2.50** per share.

Current Price (12/05/22) \$1.06  
Valuation **\$2.50**

### OUTLOOK

HeartCore Enterprises is an established software development company based in Tokyo, Japan and operates in four core segments. These include 1) Content Management in which the core product is HeartCore CMS, 2) Digital Transformation which includes Controlio, myInvenio, Apromore and HeartCore Robo, 3) GO IPO, a consulting service that helps Japanese companies prepare for a U.S. Nasdaq public listing, and 4) Sigmaways, a planned acquisition that specializes in infrastructure modernization. We believe the company is poised for strong growth due to its entry in the U.S. market and strong end market demand.

## KEY INVESTMENT POINTS

Source: HeartCore Investor Presentation

- HeartCore Enterprises (NASDAQ:HTCR) is an established software development company based in Tokyo, Japan and currently has a market capitalization of \$18.7 million.
- The company operates in four core segments which include Content Management, Digital Transformation, GO IPO and the expected acquisition of Sigmaways.
- The company has a large installed user base of business and government agency customers which are mostly based in Japan at this time.
- The company accelerated its efforts to establish a presence in North American markets by agreeing to acquire California based Sigmaways. The acquisition is expected to close in January 2023.
- The company's customer retention rate on its core products is approximately 95% which creates a steady stream of recurring revenues.
- The company is led by an experienced management team with expertise in software development, technology and corporate finance.
- As of 9/30/22, the company had \$7.8 million in cash and we believe the company will be close to cash flow breakeven in the 4<sup>th</sup> quarter of 2022 or early 2023.
- We believe HeartCore is poised for strong profitable growth going forward and the stock is worth **\$2.50** based on our discounted cash flow calculation which incorporates conservative estimates and a high discount rate.

## OVERVIEW

Source: HeartCore.com

HeartCore Enterprises (NASDAQ:HTCR) is an established software development company based in Tokyo, Japan and operates in four core segments. These include 1) Content Management in which the core product is HeartCore CMS, 2) Digital Transformation which includes Controlio, myInvenio, Apromore and HeartCore Robo, 3) GO IPO, a consulting service that helps Japanese companies prepare for a U.S. Nasdaq public listing and 4) the announced acquisition of Sigmaways which is expected to close in January 2023.

HeartCore was founded in 2001 and has 44 employees at this time of which approximately half are devoted to software programming and engineering. The company has an established customer base with over 800 active customers and maintains a very high retention rate of approximately 95%. The company went public through an initial public offering in February 2022 raising \$15 million in proceeds. The IPO was priced at \$5.00 per share.

In September 2022, HeartCore announced they had entered into an agreement to acquire 51% of Sigmaways, a California based digital technology company. This acquisition would expand the operational footprint in the U.S. and is expected to add significantly to HeartCore's revenue base. In 2021, Sigmaways generated approximately \$8.7 million in revenues. The acquisition is also expected to create complementary cross-sell and upsell opportunities for both organizations. The transaction is expected to close in early 2023.

The company is led by an experience management with deep expertise in software development, technology and corporate finance. Sumitaka Kanno (Yamamoto) is the founder of HeartCore and has served as the Chief Executive Officer and member of the Board of Directors of HeartCore since June 2009.

With \$7.8 million in cash on the balance sheet available as of the end of the 3<sup>rd</sup> quarter of 2022, we believe the company is self-funded to support future operations and does not need to access the debt or equity markets going forward. However, for potential material future acquisitions, the company may access the capital markets to finance a large acquisition.

---

## PRODUCT PORTFOLIO

### Content Management

Source: HeartCore Investor Presentation

Large enterprises or organizations that operate complex websites, blogs, mobile apps, ecommerce businesses or social networks need to utilize and manage large amounts of content to deliver their services or products. These websites often contain many thousands of pages. To handle this complex task, most large enterprises use a content management system, also referred to as a customer experience management platform. These platforms integrate marketing, sales, service, and content management systems as well as other tools and integrations that enable companies to attract and engage customers throughout the customer lifecycle.

The company's core offering that provides these services is the HeartCore CMS which allows the user to create, manage, and modify content on websites without the need for specialized technical knowledge. Key benefits to this system include a high degree of user-friendliness, relatively quick deployment compared to other complex processes, low ongoing maintenance requirements, extendable functionality, and SEO friendly features.

Specific HeartCore CMS features include an easy-to-use editor that can create and update web pages as easily as entering text into a word processor as well as the ability to import data by simply copying and pasting specific information and content. The system offers secure and privacy-oriented publishing settings where the user can view private information on the restricted website before it gets publicly

disclosed. The company believes HeartCore CMS is the only CMS in the world that can publish tens of thousands of pages simultaneously as well as thousands of PDF files at the same time. The product also offers granular access rights and detailed access permissions and flexible workflows. This allows users to reduce the production and operation time and ensure the accuracy of information. Lastly, HeartCore CMS offers extensive review and preview functions that's show final versions across all screen sizes and device types. The program can also preview registered content from two or three generations ahead with a future date on the same page.

The total addressable market size for content management software is approximately \$6.0 billion and expected to grow at annualized rate of 18% over the next ten years. The content management segment represented 81% of 1st quarter 2022 revenues.

## Digital Transformation

This segment consists of three separate offerings which includes robotic process automation (RPA), task mining and process mining. They share a common goal of accelerating the digital transformation of enterprises across their entire business lines, particularly in the areas of marketing, sales, and customer service.

Source: HeartCore Investor Presentation

Robotic process automation is an advanced technology that allows automation for a predetermined set of tasks. RPA robots can mimic most human-computer interactions to carry out error-free tasks at high volume and speed. These task cans include invoice processing, process sales orders, account reconciliation, employee onboarding, payroll, and enterprise data entry for core processes such as finance, human resources, manufacturing, supply chain, services, and procurement.

HeartCore Robo is the company's flagship RPA product and offers automation of key business applications such as packaged business software, internally developed software, website applications and mobile apps. This RPA offering can work across all platforms including remote and virtual environments as well as all operating systems and browsers. Specific features include high-speed identification of operation targets on the screen using a proprietary image analysis engine as well as automatic HTML operations and data acquisition within web pages. The product also utilizes highly advanced optical character recognition tools. The company believes it may be the only major RPA provider to focus on Android and Mac devices.

Source: HeartCore Investor Presentation

Task mining is an important technology that enables organizations to detect and analyze the tasks employees perform as they relate to completing larger processes which works by monitoring the actions users take. The purpose of using task mining software is to discover and understand the tasks employees are performing. This software process became particularly important during the Covid-19 pandemic as a substantial number of office-based employees were forced to work from home. The company's task mining offering is Controlio which began operations in March 2020. The company believes Controlio has a much more comprehensive and inclusive solution than competitors such as Skysea, LanScope, and MeeCap. Task mining represents approximately 4.0% of total company revenues.

Process mining is the technology that investigates and analyzes the large amounts of data in enterprise event logs to discover and present end-to-end processes that the organization is performing to complete work. The purpose of most process mining applications is to optimize and improve business processes which may lead to more efficient operations and even automation of processes.

The company has two process mining offerings, myInvenio which began operations in March 2019, and Apromore which became available for sale in June 2021. Similar to the company’s task mining offerings, the company believes myInvenio has a far more comprehensive process mining solution than competitors such as Celonis, Signavio, and UiPath. Process mining represents approximately 10% of total company revenues.

### Go IPO Consultation

Go IPO is a new service from HeartCore that helps Japanese companies achieve a NASDAQ public listing in the U.S. Launched in April 2022, this NASDAQ consulting service is based on the company’s own go-public experience as well as its general business expertise in navigating cross border issues between Japan and the U.S. From the Japanese market perspective, the company helps with audit attestation, underwriter exams and Tokyo Stock Exchange related information and processes. For the U.S. markets, the company helps with auditor audit attestation for two years, reviews by the underwriter and their attorneys, as well as SEC confirmation. More specifically, the company performs the difficult task of converting Japanese accounting data to IFRS and U.S. GAAP accounting principles and works with the audit firm.

Source: HeartCore Investor Presentation

## **Sigmaways (51%)**

In September 2022, HeartCore announced that they signed an agreement to acquire 51% of Sigmaways, a California based digital technology company. This acquisition would expand the operational footprint in the U.S. and is expected to add significantly to HeartCore's revenue base. In 2021, Sigmaways generated approximately \$8.7 million in revenues. The acquisition is also expected to create complementary cross-sell and upsell opportunities for both organizations.

Key services include Infrastructure Modernization in which the company leads organizations in their business modernization efforts. This includes seeking new ways to leverage data, artificial intelligence, and optimization of other technologies.

Sigmaways also offers Data Analytics & Business Intelligence services where they use data-driven insights help businesses to unlock hidden opportunities. The company delivers data management, business intelligence and analytics solutions to optimized and realize the true potential of data.

Through Digital Commerce services, the company helps clients build customer centric solutions across a variety of retail channels. These solutions adapt to unexpected market changes and delivers customized products and services.

Sigmaways also helps clients to attain operational efficiency by integrating Robotic Process Automation (RPA) with technologies to achieve enterprise transformation across the organization. This includes provide consulting to clients for understanding existing automation levels and discovering areas of new opportunities.

This transaction is expected to close in January 2023 and is expected to provide a rapid runway for growth in the U.S. markets.

---

## **STRATEGY & BUSINESS MODEL**

For the Content Management segment, the company is targeting enterprises with over \$100 million in annual revenues and particularly those business that use websites for e-commerce, or to engage and inform customers. HeartCore markets its products at software and technology trades shows, partnership arrangements, direct sales to companies through their own sales team, and referrals from current customers. The pricing arrangement is typically \$26,000 per on-premise server plus 18% from licensing. There are also annual maintenance fees.

For most of the digital transformation businesses, the company is targeting larger organizations with over \$1 billion in revenues and those that have a need to make their operations and business processes more efficient and productive. Similar to the CMS segment, the company markets its products at trades shows, seminars, partnership arrangements, and direct sales to companies through their own sales team. The pricing model is \$50,000 per year for process mining, \$250 per year per unit for task mining, and an annual \$5,000 subscription fee per year for RPA. The company has an alliance with IBM that they hope to expand, as well as other partnerships with consulting and ERP firms.

Sample customers for the company include such iconic names as Japan Airlines, Hitachi, Seibu Railway, Mitsubishi UFJ Morgan Stanley Securities, Ricoh, Tokyu department stores.

## FINANCIAL REVIEW

For the 2021 fiscal year ending 12/31/21, the company generated \$10.8 million in revenues which was an increase of approximately 20% over the prior year. Gross margins were 47.9% for the year compared to 44.5% in 2020. The company experienced growth in most its product offerings and achieved higher gross margins due to increased volumes and strong pricing power.

Operating income decreased to \$59,018 for the year compared to \$258,705 in the prior year largely due to an increase in listing expenses in preparation for the company's February 2022 IPO. Listing expenses totaled \$867,624 compared to no listing related expenses in the prior year. Despite a net loss of (\$338,156) for the year, HeartCore generated positive operating cash flow of \$766,300 and with capital expenditures of only \$36,153, free cash flow came in at \$730,147.

For the 3<sup>rd</sup> quarter of 2022, the company reported revenues of \$1.87 million compared to revenues of \$3.47 million in prior year period which was primarily attributable to a decrease in revenue from sales of on-premise software as an important customer renewed its software license in July 2021. In addition, there was a decrease in revenue from software development which was offset by revenue from the newly established Go IPO consulting service.

Gross margins decreased to 17.6% in the 3<sup>rd</sup> quarter compared to 48.5% in the prior year period. The company reported an operating loss of (\$2.0) million compared to operating income of \$0.21 million in 3<sup>rd</sup> quarter of 2021.

Cash on the balance sheet as of the end of the 3<sup>rd</sup> quarter stood at \$7.8 million and total outstanding debt was \$1.7 million.

We expect HeartCore to reach breakeven profitability in the 1st quarter of 2023 and show net profits and free cash flow in the remaining quarters of 2023. The company will not likely have to access the capital markets to fund operations, however it may do so to finance potential acquisitions as they occur.

The company has 17.7 million common shares outstanding and 1.5 million warrants outstanding. Insiders hold approximately 71% of total shares with CEO with founder Sumitaka Kanno (Yamamoto) owning 62.2% of total common shares.

### Increasing revenues per client

Year	Revenue	# of Active Client	Revenue/Client
2020	\$6,750,800	13	\$519,292
2021	\$8,653,918	15	\$576,928
2022 - As of June	\$5,800,067	17	\$764,706

Source: HeartCore Investor Presentation

## COMPETITION

The company believes its core Content Management System offerings provide a more comprehensive suite of features than its major competitors. In addition, the company has applied for a patent in Japan for a solution that enables personalization and user tracking without the use of cookies which can be used in increasingly stringent privacy protection situations. The company also believes it is far ahead of the competition in its Process Mining and Task Mining offerings as well.

## MANAGEMENT

Sumitaka Kanno (Yamamoto), CEO, is the founder of HeartCore and has served as the Chief Executive Officer and member of the Board of Directors of HeartCore since June 2009. Mr. Kanno is an experienced information technology software programmer and graduated with a bachelor's degree from Kansai Gaidai University, Osaka, Japan. He has worked at BroadVision.com in Japan, a global software vendor and former NASDAQ company, where he specialized in websites and software.

Kimio Hosaka, Chief Operating Officer, has been a member of the Board of Directors since May 18, 2021. Mr. Hosaka has served as the Chief Operating Officer and member of the Board of Managers of HeartCore since August 2015. Mr. Hosaka graduated with a bachelor's degree in physics from Chuo University, Tokyo, Japan. Mr. Hosaka brings 20 years of experience in technology as an engineer and manager at All Nippon Airways Systems, Electronic Data Systems, and Heartcore.

Hidekazu Miyata has served as Chief Technical Officer since May 18, 2021. Mr. Miyata graduated with a bachelor's degree in economics from Doshisha University, Japan. Mr. Miyata worked for software development company, Electronic Data Systems and has more than 20 years of software development experience.

Qizhi Gao has served as the Chief Financial Officer of HeartCore since May 2017. From December 2007 through April 2017, Mr. Gao served as the Group Leader, Finance & Accounting Department at Marubishi Corporation in Tokyo, Japan. Mr. Gao graduated with a bachelor's degree in computer accounting from Chuo College of Information and Accounting.

Keisuke Kuno has served as CX division Vice President since May 18, 2021. Since March 2010, Mr. Kuno has also served as the head of the CX division and member of the Board of Directors of HeartCore. Mr. Kuno graduated with a bachelor's degree in business administration from Hosei University, Tokyo, Japan. Mr. Kuno does not hold, and has not previously held, any directorships in any reporting companies.

---

## RISKS

- The company may require additional funding for its growth plans and such funding may result in a dilution of your equity investors. If the costs of implementing the company's growth plans exceeds internal estimates significantly or if the company can't come across opportunities to grow through expansion plans which cannot be predicted at this time, and if funds generated from our operations prove inadequate for these purposes, the company may need to raise additional funds to meet these funding requirements. These additional funds may be raised by issuing equity or debt securities or by borrowing from banks or other resources.
- Subscription renewal rates may decrease, and any decrease could harm future revenue and operating results. Customers have no obligation to renew their subscriptions for the company's processes and services after the expiration of their subscription periods, substantially all of which are one year or less. In addition, customers may seek to renew for lower subscription tiers, for fewer contacts or seats, or for shorter contract lengths, which could materially affect the company's operating results.
- The company faces significant competition from both established and new companies offering digital marketing, task and process mining, content management, customer experience management, and robotic process automation. The digital marketing, task and process mining, content management, customer experience management, and robotic process automation market is evolving, highly competitive and significantly fragmented. With the introduction of new technologies and the potential entry of new competitors into the market, the company expects competition to persist and intensify in the future, which could harm the company's operating results.
- The company may acquire or invest in other companies or technologies in the future, which could divert management's attention, fail to meet management expectations, result in additional dilution to current shareholders, increase operating expenses, disrupt operations or harm financial results. There are many inherent risks in integrating and managing acquisitions.
- The ability to raise capital in the future may be limited and the failure to raise capital when needed could prevent the company from growing or meeting its financial goals. The business and operations may consume resources faster than anticipated. In the future, the company may need to raise additional funds to invest in future growth opportunities and additional financing may not be available based on prevailing market conditions.

## INSIDER TRADING AND OWNERSHIP

Currently, Sumitaka Yamamoto, the CEO of the company, beneficially owns 10,984,539 shares of common stock, which currently represents approximately 62.2% of the voting power of the outstanding capital stock.

Source: HeartCore SEC filings

## VALUATION

The markets in which Heartcore is focused on is expected to produce above average growth rates for an extended period of time. We expect the company's revenues to grow at solid double-digit rates over the next 10 years.

We expect gross margins to rebound in 2023 to approximately 69% and steadily grow over time to roughly 75%. Breakeven profitability on an operating income basis should occur at this level of gross margins.

Our primary valuation tool utilizes a Discounted Cash Flow process. Our base case includes revenues growing at a CAGR of 22%, break-even operating results in fiscal 2023, and 75% gross margins being achieved in the 2033 fiscal year. Under this scenario, our DCF based valuation target is approximately **\$2.50** per share.

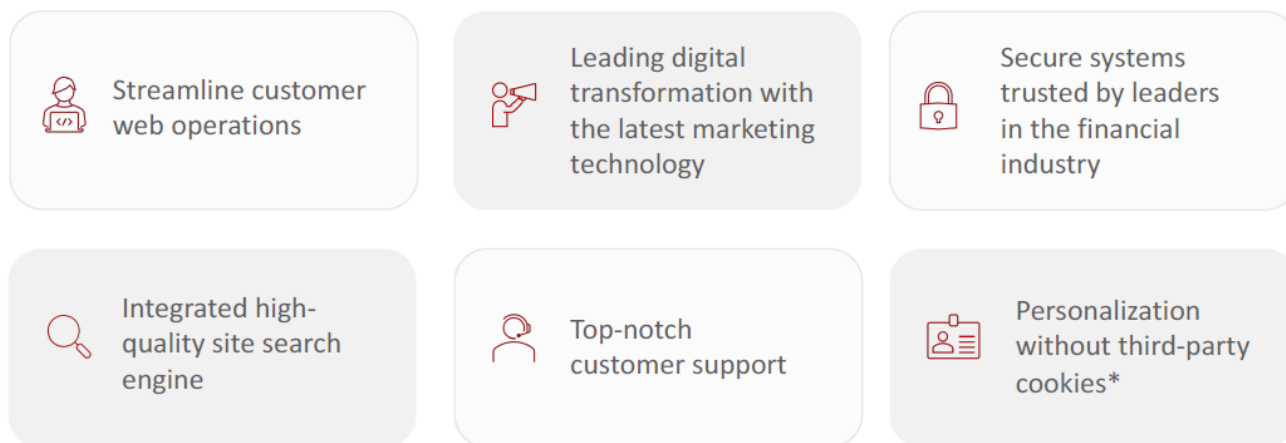

We believe this to be a conservative estimate as revenue growth rates could greatly exceed our estimates as a result better than expected sales execution. There is also potential for gross margin improvements above our estimates. Our discount rate also utilizes a high ERP to account for execution risks and possible macroeconomic disruptions.

## SUMMARY

We believe HeartCore Enterprises is entering a strong growth phase due to multiple factors. The company's key industry verticals of customer management, content management, and data mining are expected to grow at strong double-digit rates. The company has multiple cross-selling and up-selling opportunities across all of its segments and product lines, particularly after the Sigmaways acquisition. In addition, expansion into the U.S market is just beginning with a new office being opened up in the Silicon Valley region of California and the Sigmaways deal. The 90%+ retention rate will provide a solid base of recurring revenues and will also help with marketing and sales efforts as its satisfied customer base is reflected in those numbers. Currently, over 650 customers will be able to upgrade to the latest version of HeartCore CMS (Version 12).

HeartCore has the potential to grow both revenues and earnings at very robust double-digit growth rates if it is able to execute on its strategic plans. Prudent tuck-in acquisitions will also play a role in future growth as the company attempts to capitalize on synergistic opportunities. The company's current stock price does not likely reflect that potential level of profitable growth going forward.

## DISCLOSURES

The following disclosures relate to relationships between Zacks Small-Cap Research ("Zacks SCR"), a division of Zacks Investment Research ("ZIR"), and the issuers covered by the Zacks SCR Analysts in the Small-Cap Universe.

### ANALYST DISCLOSURES

I, Tom Kerr, hereby certify that the view expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the recommendations or views expressed in this research report. I believe the information used for the creation of this report has been obtained from sources I considered to be reliable, but I can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice.

### INVESTMENT BANKING AND FEES FOR SERVICES

Zacks SCR does not provide investment banking services nor has it received compensation for investment banking services from the issuers of the securities covered in this report or article.

Zacks SCR has received compensation from the issuer directly, from an investment manager, or from an investor relations consulting firm engaged by the issuer for providing non-investment banking services to this issuer and expects to receive additional compensation for such non-investment banking services provided to this issuer. The non-investment banking services provided to the issuer includes the preparation of this report, investor relations services, investment software, financial database analysis, organization of non-deal road shows, and attendance fees for conferences sponsored or co-sponsored by Zacks SCR. The fees for these services vary on a per-client basis and are subject to the number and types of services contracted. Fees typically range between ten thousand and fifty thousand dollars per annum. Details of fees paid by this issuer are available upon request.

### POLICY DISCLOSURES

This report provides an objective valuation of the issuer today and expected valuations of the issuer at various future dates based on applying standard investment valuation methodologies to the revenue and EPS forecasts made by the SCR Analyst of the issuer's business. SCR Analysts are restricted from holding or trading securities in the issuers that they cover. ZIR and Zacks SCR do not make a market in any security followed by SCR nor do they act as dealers in these securities. Each Zacks SCR Analyst has full discretion over the valuation of the issuer included in this report based on his or her own due diligence. SCR Analysts are paid based on the number of companies they cover. SCR Analyst compensation is not, was not, nor will be, directly or indirectly, related to the specific valuations or views expressed in any report or article.

### ADDITIONAL INFORMATION

Additional information is available upon request. Zacks SCR reports and articles are based on data obtained from sources that it believes to be reliable, but are not guaranteed to be accurate nor do they purport to be complete. Because of individual financial or investment objectives and/or financial circumstances, this report or article should not be construed as advice designed to meet the particular investment needs of any investor. Investing involves risk. Any opinions expressed by Zacks SCR Analysts are subject to change without notice. Reports or articles or tweets are not to be construed as an offer or solicitation of an offer to buy or sell the securities herein mentioned.

### CANADIAN COVERAGE

This research report is a product of Zacks SCR and prepared by a research analyst who is employed by or is a consultant to Zacks SCR. The research analyst preparing the research report is resident outside of Canada, and is not an associated person of any Canadian registered adviser and/or dealer. Therefore, the analyst is not subject to supervision by a Canadian registered adviser and/or dealer, and is not required to satisfy the regulatory licensing requirements of any Canadian provincial securities regulators, the Investment Industry Regulatory Organization of Canada and is not required to otherwise comply with Canadian rules or regulations.
